irvan.sandoval@gmail.com

081322061606

Bandung, Jawa Barat, 40617, Indonesia

Date / Place of birth

26 November 1993 / Bandung

Nationality

Indonesia

Profile

I'm 32 years old married man, not young anymore of course, but my passion about the digital world is limitless. I specialize in IoT engineering, web development, and IT programming, with a focus on creating practical solutions for real-world problems.

My journey in technology has taken me through various projects - from developing IoT monitoring systems for oil fields to building custom CMS solutions for companies. I love combining my technical skills with business management to create impactful solutions.

Employment History

Web Developer at Freelance, Bandung

2013–2017

Built responsive websites and web applications for clients. Focused on creating user-friendly interfaces, implementing CMS solutions, and maintaining web standards for optimal performance and accessibility.

Developer & IoT Engineer at Audemars Indonesia, Jakarta

2017–2023

Developed IoT monitoring systems, company profile websites with custom CMS, and various web applications. Specialized in sensor integration, real-time data monitoring, and full-stack web development using PHP and JavaScript.

Executive Manager at Audemars Indonesia, Jakarta

2023–Present

Leading financial management and purchasing operations while maintaining technical expertise. Responsible for strategic decision-making, budget planning, and supplier relationships. Managing cross-functional teams to ensure operational efficiency.

Education

D3 Informatics Engineering, Universitas Padjajaran, Bandung

2012–2017
